

Tetra West Solar

ENERGY INDEPENDENCE - NEVER LOSE POWER, SAVE MORE WITH SOLAR

Hybrid Energy System

Energy management system combines power from multiple sources including: Solar, Utility Power, Energy Storage and Auto-starting Generator.

Remote Power for Power Anywhere.

From 2kW to 80kW continuous power, surge power for starting Air Conditioners, pumps and motors, 6kW to 160kW.

Solar Powered

Power from Sun – even works on cloudy days. Solar and batteries supply power during the day. Switches to generator power if batteries are depleted. In times of high power demand or low sunlight Generator supplements power while recharging batteries, then shuts down, reducing fuel and noise.

Large Storage system

Inverter/Batteries can operate

standalone for many hours, including air conditioning! In times without fuel, system can provide critical power.

Fully Integrated system

Includes Energy Management system, Inverters, Charge Controllers, Transfer switches, Energy Storage, Outlets and Generator - Pre-packaged and tested assuring high quality.

Easy Installation

Pre-packaged primary systems minimizes electrical installation costs. Solar panels and mounting hardware Available. Multiple designs for your unique needs. 130-150 mph designs available.

Never Lose power

Seamless transition between sources. Power never goes out. Like a computer UPS!

Saves Fuel

Generator fills in when renewable and utility sources are not available. Operates at high power, running everything & recharging batteries. Shuts down when batteries

full. Up to 90% savings versus traditional generators. Pays for itself in as little as 6 Months.

Reduced Maintenance

Generator only runs when needed. Mi-Grid generators run at most a few of hours per day. Time before maintenance is significantly increased. Traditional generators run 24/7. With run time reduced by run 90%

Not just for Off-Shore

But Mi-Grid is not just for off-grid. Mi-Grid works great in high cost power areas, or areas with unreliable or intermittent power. Typical Electrical savings are 30% over standard grid-tied solar while providing multi-source power reliability and backup. With Mi-Grid you never lose power.

Come see us!

We are in booth 873, next to the Astrodome on the way to NRG Arena.
